ANGIOTECH RECEIVES APPROVAL FOR QUILL™ SRS PDO, MONODERM™, POLYPROPYLENE AND NYLON PRODUCT LINES FOR SALE IN BRAZIL

VANCOUVER, BC, August 13, 2009 – Angiotech Pharmaceuticals, Inc. (NASDAQ: ANPI; TSX: ANP), today announced that it has received approval to begin marketing the Quill™ SRS Polydioxanone (PDO), MONODERM™, Polypropylene and Nylon product lines in Brazil.

“We are very excited about the approval of the Quill SRS product lines in Brazil, one of the largest surgical markets in the world. Quill has been lauded in the U.S., Europe and Canada for the efficiency it brings to wound closure. Now, Brazilian patients and surgeons in plastics, orthopedics and gynecology can benefit from it as well,” said Dr. William Hunter, President and CEO of Angiotech.

The Quill SRS product lines include two absorbable sutures – MONODERM and PDO, and two non-absorbable sutures – Polypropylene and Nylon, and are approved for sale in the U.S., Europe, and Canada.

About the Quill™ Self-Retaining System (SRS)

Quill SRS represents a revolutionary technology in wound closure made possible by bidirectional fixation within the wound. Its patented design allows the surgeon to begin closure at the midpoint of the wound and suture in two directions from the midpoint. Barbs within the Quill SRS distribute tension across the wound and eliminate the need for knots.

Forward Looking Statements

Statements contained in this press release that are not based on historical fact, including without limitation statements containing the words “believes,” “may,” “plans,” “will,” “estimates,” “continues,” “anticipates,” “intends,” “expects” and similar expressions, constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 and constitute “forward-looking information” within the meaning of applicable Canadian securities laws. All such statements are made pursuant to the “safe harbor” provisions of applicable securities legislation. Forward-looking statements may involve, but are not limited to, comments with respect to our objectives and priorities for the remainder of 2009 and beyond, our strategies or future actions, our targets, expectations for our financial condition and the results of, or outlook for, our operations, research and development and product and drug development. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, events or developments to be materially different from any future results, events or developments expressed or implied by such forward-looking statements. Many such known risks, uncertainties and other factors are taken into account as part of our assumptions underlying these forward-looking statements and include, among others, the following: general economic and business conditions in the United States, Canada and the other regions in which we operate; market demand; technological changes that could impact our existing products or our ability to develop and commercialize future products; competition; existing governmental regulations and changes in, or the failure to comply with, governmental regulations; availability of financial reimbursement coverage from governmental and third-party payers for products and related treatments; adverse results or unexpected delays in pre-clinical and clinical product development processes; adverse findings related to the safety and/or efficacy of our products or products sold by our partners; decisions, and the timing of decisions, made by health regulatory agencies regarding approval of our technology and products; the requirement for substantial funding to conduct research and development, to expand manufacturing and commercialization activities; and any other factors that may affect our performance. In addition, our business is subject to certain operating risks that may cause any results expressed or implied by the forward-looking statements in this Quarterly Report on Form 10-Q to differ materially from our actual results. These operating risks include: our ability to attract and retain qualified personnel; our ability to successfully complete pre-clinical and clinical development of our products; changes in our business strategy or development plans; our failure to obtain patent protection for discoveries; loss of patent protection resulting from third-party challenges to our patents; commercialization limitations imposed by patents owned or controlled by

third parties; our ability to obtain rights to technology from licensors; liability for patent claims and other claims asserted against us; our ability to obtain and enforce timely patent and other intellectual property protection for our technology and products; the ability to enter into, and to maintain, corporate alliances relating to the development and commercialization of our technology and products; market acceptance of our technology and products; our ability to successfully manufacture, market and sell our products; the availability of capital to finance our activities; our ability to restructure and to service our debt obligations; and any other factors referenced in our other filings with the applicable Canadian securities regulatory authorities or the Securities and Exchange Commission ("SEC"). For a more thorough discussion of the risks associated with our business, see the "Risk Factors" section in our annual report for the year ended December 31, 2008 filed with the SEC on Form 10-K, and our quarterly report for the three months ended June 30, 2009 filed with the SEC on Form 10-Q.

Given these uncertainties, assumptions and risk factors, investors are cautioned not to place undue reliance on such forward-looking statements. Except as required by law, we disclaim any obligation to update any such factors or to publicly announce the result of any revisions to any of the forward-looking statements contained in this press release to reflect future results, events or developments.
